

EcoFresh Beverage Co.

Sustainability Report 2025

Executive Summary

EcoFresh Beverage Co. is committed to a sustainable future. Our eco-friendly products are made with natural ingredients and we are dedicated to protecting the planet for future generations. We believe in green innovation and responsible business practices.

Our Sustainability Commitments

- We are working towards carbon neutrality by 2030
- Our packaging is designed to be environmentally responsible
- We source ingredients from sustainable suppliers
- Our facilities use renewable energy solutions

Environmental Performance

Total carbon emissions (Scope 1 & 2): 142,000 tonnes CO₂e (2024)

Previous year emissions: 138,000 tonnes CO₂e (2023)

Note: Scope 3 emissions are not currently tracked.

Our bottles are made with "up to 30% recycled content" - leading the industry in sustainable packaging innovation. We have eliminated single-use plastic straws from our product line, replacing them with paper alternatives.

Water Usage: 4.2 billion liters consumed in manufacturing (2024)

Water Reduction Target: Reduce water intensity by 5% by 2030 (from 2024 baseline)

Certifications and Standards

We follow our own internal EcoFresh Green Standard for all sustainability assessments. Our sustainability team conducts annual self-audits to ensure compliance with our internal guidelines.

Community Impact

EcoFresh donated \$500,000 to environmental charities in 2024, representing 0.02% of our \$2.5 billion annual revenue.

Looking Ahead

We remain committed to our journey toward a more sustainable future. Our team is exploring various options to reduce our environmental footprint and we look forward to sharing more updates in the coming years.
