

GreenTech Solutions Inc.

ESG Disclosure & Annual Impact Report 2025

CEO Letter: A Carbon Neutral Future

I am proud to announce that GreenTech Solutions achieved carbon neutrality in 2024. Our commitment to net-zero emissions demonstrates that technology companies can lead the climate transition while delivering shareholder value. We offset 100% of our operational emissions through verified carbon credits.

Emissions Data (Audited by Deloitte)

Scope 1 (Direct): 8,200 tonnes CO₂e

Scope 2 (Electricity): 45,600 tonnes CO₂e

Scope 3 (Supply Chain): 892,000 tonnes CO₂e

TOTAL: 945,800 tonnes CO₂e

Carbon Offset Portfolio:

- **Forestry credits (Brazil): 35,000 tonnes (verified VCS)**

- **Renewable energy credits: 18,800 tonnes (Gold Standard)**

Total offsets purchased: 53,800 tonnes

Note: Carbon neutrality claim covers Scope 1 and Scope 2 only (53,800 tonnes offset against 53,800 tonnes emitted). Scope 3 emissions (892,000 tonnes) representing 94.3% of total emissions are excluded from the neutrality boundary.

Renewable Energy

Marketing Statement: "Powered by 100% renewable energy"

Actual breakdown:

- **Direct renewable PPAs: 22% of total electricity**

- **Unbundled RECs (Renewable Energy Certificates): 78% of total electricity**

Note: Unbundled RECs do not represent actual delivery of renewable electrons. They are accounting instruments that can be purchased separately from physical electricity supply.

Supply Chain

We require all Tier 1 suppliers to sign our Sustainability Pledge. Current compliance:

- Tier 1 suppliers signed: 67%

- Tier 1 suppliers audited: 12%

- Tier 2+ suppliers assessed: 0%

Our products contain conflict minerals sourced from regions with known human rights concerns. We are developing a responsible minerals policy (target publication: 2027).

Waste and Circular Economy

E-waste generated: 14,200 tonnes (2024)
E-waste recycled: 2,100 tonnes (14.8%)
Remaining 85.2% sent to landfill or incineration.

Marketing claim: "Industry-leading e-waste recycling program"
Industry average recycling rate: 17.4% (EPA 2024 data)
