

NaturePure Cosmetics

Product Sustainability & Packaging Claims 2025

Product Line Overview

NaturePure is 100% committed to clean beauty. All our products are natural, eco-friendly, and designed with the planet in mind. Our packaging is sustainable and our formulas are green.

Packaging Claims (as printed on product labels)

Front of Package:

- "100% Recyclable Packaging"
- "Made with Ocean-Bound Plastic"
- "Plastic Negative - We Remove More Than We Use"
- "Biodegradable Formula"
- "Carbon Neutral Product"

Fine Print (back label, 6pt font):

- "Recyclability varies by municipality. Check local recycling guidelines."
- "Ocean-bound plastic: outer carton only (represents 8% of total packaging weight). Primary container is virgin PET plastic."
- "Plastic negativity calculated using credit system. Credits purchased from third-party collection programs in Southeast Asia. No direct removal from oceans."
- "Biodegradability tested under industrial composting conditions (58C, 90 days). Product will NOT biodegrade in home compost, landfill, or marine environments."
- "Carbon neutrality achieved through purchase of carbon credits. Product lifecycle emissions: 2.4 kg CO2e per unit."

Ingredient Sourcing

Marketing: "Ethically sourced from small farms"

Reality: 73% of raw materials purchased through commodity brokers. Direct farm relationships exist for 4 of 47 ingredients (8.5%).

Palm oil derivative present in 28 of 35 product SKUs. RSPO certification: "Mass Balance" level (allows mixing certified and non-certified palm oil in supply chain).

Animal Testing Statement: "Cruelty-free and never tested on animals"

Footnote: "NaturePure does not test on animals. However, some ingredients may have been tested on animals by our raw material suppliers prior to our procurement. NaturePure does not conduct or commission animal testing for finished products sold in markets that do not require it."

Environmental Metrics

Total plastic used in packaging: 890 tonnes (2024)

Previous year: 820 tonnes (2023) - 8.5% INCREASE

Marketing claim: "Reducing our plastic footprint year over year"

Basis for claim: Plastic per unit decreased 2% (due to increased sales volume, not absolute reduction)

Water footprint: 12.4 million liters (manufacturing only)

Full lifecycle water footprint (including ingredient farming): 340 million liters

Marketing reference: "Low water footprint manufacturing"

Certifications Held:

- Leaping Bunny (cruelty-free - finished products only)

- FSC (paper cartons only - 15% of packaging by weight)

Certifications NOT held: B Corp, ISO 14001, EWG Verified, USDA Organic
